

The Anonymous Email.com Files Patents for the First Two Way "Anonymous" Text Messaging Service

SCOTTSDALE, Ariz. -- The Suggestion Box, Inc., (Pink Sheets:SGTB) dba www.TheAnonymousEmail.com, is pleased to announce that it has applied for a patent on its innovative anonymous SMS (Short Message Service) system. The anonymous SMS system allows subscribers to send anonymous text messages to cell phones and other text message receivers. The patent filing covers TheSuggestionBox's advanced technology that allows text message recipients to reply back to the anonymous sender, and still maintain the sender's anonymity.

There are a few other companies that have anonymous text messaging for sending, however that sender cannot receive a message back from the person they originally text the message too.

The company is hoping that some of the larger wireless companies such as Verizon Wireless (VZ) or mobile phone manufacturers such as Motorola (MOT), may include anonymous text messaging as a part of their service sometime in the future. The system will be available to TheAnonymousEmail.com subscribers in the next few weeks.

TheAnonymousEmail.com is a website dedicated to allowing emails to be sent untraceable and anonymously. Whether it's to complain to someone that they're drinking too much, to alert a school that there is a drug dealer in the area or to tell an employer that someone is stealing at work, there are many reasons to want to send an anonymous email. Revenues are attained by subscriptions and by businesses looking for a method to discourage theft on the premises.
